EXECUTIVE SUMMARY

CS student **(CGPA: 9.072, Rank: 10/210)** with experience building scalable backend systems and data-driven applications using Java, Python, and databases. Strong problem-solving and team collaboration skills with experience translating technical solutions into real-world impact.

SKILLS

Technical: Java, Python, C, Excel, PowerPoint, Spring Boot, MongoDB, MySQL, Redis, Machine Learning, Time Series Forecasting, Statistical Analysis, API Testing, Cursor, FireCrawl
Core Competencies: Data Structures & Algorithms, Backend Development, System Design, Data Analysis

EXPERIENCE

Data Analyst Intern (Cohort Lead) Jul 2025 – Aug 2025
CRY (Child Rights and You)

- Led intern team through complete data analysis workflow on **10 lakh rows** of child labor and migration datasets; drove stakeholder presentations that informed organizational strategic decisions.
- Applied statistical techniques (chi-square correlation, hypothesis testing) to extract actionable insights; translated complex findings into clear, numbers-driven narratives for non-technical leadership.

General Administrator Mar 2025 – Mar 2026
SSN-SNUC Model United Nations (MUN) Society

- Led communications strategy for InterMUN and IntraMUN 2025; increased delegate registrations by 50% through targeted digital campaigns and media strategy.

PROJECTS

- **Saathi, Voice-Guided Government Services Assistant:** Built a 23-language voice assistant for EPFO PF withdrawals using GPT-OSS-120B and Sarvam AI for speech recognition and synthesis. Implemented semantic UI mapping and contextual control highlighting, achieving **92% task completion** across **500 test flows**.
- **National Examination Management System (NEMS):** Architected a MongoDB-backed backend for high-throughput examination workflows; optimized schema design and database indexing to improve query performance and support scalable academic operations.
- **iceman, Agentic Faculty Data Extractor:** Built a LangGraph-based agent to extract and enrich faculty profiles across university websites, handling variable page structures and obfuscated email addresses; implemented human-in-the-loop model approvals and structured CSV generation.
- **Pre-Delinquency Intervention Platform:** Built Java/Spring Boot risk prediction backend with Redis caching and weighted feature engineering; delivered **35%** improvement in net recovery through data-informed early intervention strategy.
- **ARFIMA Model for Financial Time Series:** Engineered advanced forecasting model achieving **26.7%** RMSE improvement over baseline GARCH; specialized in capturing long-memory dependencies for financial market automation.

EDUCATION

SSN College of Engineering, B.E. CSE '28, Chennai — CGPA: 9.072 — Rank: 10
PACE Junior Science College, PCM '24, Mumbai — Score: 94% — Rank: 2
Kohinoor International School, ICSE '22, Mumbai — Score: 97% — Rank: 3

ACHIEVEMENTS & CERTIFICATIONS

- **NPTEL Top Performer:** Topper 1% in "Industry 4.0 and IIoT" (94% among 19,100) and Elite certification in "Time Series Modelling and Forecasting" by IIT Bombay.
- **Zoho Young Creators Program:** Certified for excellence in building innovative solutions on Zoho Creator (no-code/low-code platform), demonstrating advanced product and automation design capabilities.
